VOLUME IV, NUMBER 49 THE GOLD CENTER NEVADA CITY, NEVADA COUNTY, CALIFORNIA, THE COUNTY SEAT PAPER NOVEMBER 21, 1930

ABOLISH TAX ON GOLD MINES IS ADVOCATED

Banker Says Abolish Taxes on Gold Mines—Raise Value to $25—Lauds Nugget

Alden Anderson, prominent Banker of Sacramento, in a communication to the Mining Association of California comes out plainly and advocates the abolition of all taxation upon gold mining and the revaluation of gold by the government at $25 the ounce. He embodied his theory in a letter to a group of prominent New York economists in which he says:

A greater production of gold must be obtained if gold is to be maintained as the standard of monetary values. He also says that the government should "peg" or raise the price of gold to at least $25 an ounce and insists that all gold mined should be delivered to the government.

Figures are given in the communication to show that the production of gold is steadily declining in California, the nation and the world.

"This cannot continue," he writes, "if we are to rely upon gold as our commodity of ultimate redemption.

"I am not a miner, nor am I interested in mining in any way," he continues,""but it is plain to me that the Federal government should take the initiative now and commence working to the end of increasing the gold supply.

"It should be immediately provided that gold mining companies pay no taxes of any kind, corporation, income, etc., arrangements should be made to carry all compensation insurance. The several states should be importuned to amend their laws so that no gold mining company should be compelled to pay any state or county taxes. There is no impropriety in the government doing this. The government is responsible for the maintenance of a stable and an adequate financial system, backed by a sufficient gold reserve at all times for its needs.

"The status can well afford not to tax gold mines, for from the nature of the business the mines are located in areas where the normal taxes, without development would practically amount to nothing. When development starts, men are put to work, supplies are purchased, machinery and equipment obtained and the whole community is benefitted and enriched."

In arguing that the government should increase the price the writer takes occasion to land the Nugget for our feeble efforts in the same direction and says in part: "The government should increase the price or 'peg' the price of gold and take delivery on all gold mined and the government could then distribute to the arts and sciences such a part as they see fit. He says that if all the gold in the world was attracted here to this country we should then be in a position to dictate terms and control of the world' scommerce.

On the other hand, however, he says it is likely that the price setting would force other countries to "peg" the price of gold also in order to keep their gold at home, and the result would be that of stimulating gold mining all over the world.

0

GOLD HILL REPORT ON PRODUCTION

The Gold Hill, (Nev.) Development Company report a bullion production of $24,700 for the month of October. This company are operating a group of gold properties five miles noth of Round Mountain Nevada and report a sufficient amount of ore exposed to insure a long run of the mill. The drift from the 225 foot level has advanced 1,200 feet in ore and development is being increased on the 400 level.

0

FORMER OPERATOR DIES

John Jory, formerly a prominent mining operator and rancher, died at Los Angeles recently. The deceased was a prominent mine operator and cattle rancher and a pioneer of Nevada. Fifty years ago he was the owner and operator of the famous old Copper Canyon mines near Battle Mountain, Nevada.

PROSPECTOR FIND GOLD GOING $2000 TO THE TON

MOHAVE, Calif., Nov. 14—A six inch streamer of schist running with the hanging wall from the very grass roots down the shaft for 24 feet, the present depth. that will pan throughout as good as $2,000 to the ton is the latest find in the California Rand mining district.

The vein at the grass roots showed 18 inches wide. As it proceeded downward the widening becomes naturally between the hanging wall and the foot walls. At the bottom there is nothing to indicate that the vein will decrease in size. This high grade ore is being sacked for shipment to the Selby smelter of the American Smelting and Refining Company. Thirty tons from the main vein assayed $15 per ton. Like all of the ore from the Randsburg gold hills, there is no silver or other minerals present.

The discovery was made on the extreme east end of the Yellow Astor range, a section of the district that has had but little development in all of the 36 years of active mining. George Renko, Joe Shea and Ray Miller made the discovery in following up a streak on the Hercules claim located in Fiddlers Gulch opposite the second bridge on the paved road east and south of camp.

Renko and Shea in the past have dug, trenched and mined for a showing in this particular region so much that it may be the reason that miners have let the ground change hands year after year. It may be the same reason with this trio of partners when they interested Gustav Bender of San Francisco, a new arrival in the district to take a three year's lease on the Operator Divide mine and mill. After sizing up the showing made on the find and uncovering the surface, Bender took in consideration the $5,000 asked. Later on he made an offer of $1,000 cash as a first payment with the proviso that the venors stay on the job and open it up. As it has been many moons since that much cash was tendered on a first payment here the offer was accepted. Bender has no associates in the deal.

Asked what value he placed on his purchase, he replied that a million dollars would not touch it. "I've always wanted a mine of my own and now I've got it."

0

BRADLEY ACQUIRES LOW GRADE GOLD PROPERTY

Word has been received that control of the Imperial Gold Mines Corporation, owning the Independence gold properties near Copper Canyon Nevada has passed into the hands of the F. W. Bradley interests of San Francisco and a sontract has been let to Charles W. Biram, former owner of the claims, to drive a 200 foot tunnel below the present workings. The work will be under Roy H. Clark, a staff engineer for the Bradley interests.

Property of the Imperial company consisting of four claims, covers a large mineralized belt composed of quartzite breccia from 75 to 100 feet wide, forming a zone of altered quartzite on a schist foot-wall. The deposit is developed by two crosscut tunnels and surface work showing a width of 95 feet of material that is indicated to be ore of milling grade.

The claims were purchased for the Imperial Gold Mines Corporation in March of last year by H. Z. Peters and Ed. J. Roberts, organizers and heads of the Imperial Company.

Under the terms of transfer to the Bradley interests the latter takes over a majority of the stock in the Imperial Company which has authorized capital of two million dollars in shares of one dollar each par value. Present officers of the company are to resign at once and will be replaced by Bradley men.

It is stated that the Bradley Management will proceed with operations on a scale that will depend upon the results obtained in development.

No. 4 tunnel is to be driven 200 feet by contract and has been started already but has not entered the ore zone. It is near the center of the deposit and 100 feet below the elevation of the lowest tunnel that is in ore.

FAMOUS OLD CHEROKEE MINE IS TO REOPEN BY NEW COMPANY

Property Acquired by San Francisco Interests and will Operate Without Using Monitors—To be Completely Electrified and Rehabilitated

OROVILLE, (Butte County)—The old Cherokee mine, once famous hydraulic property, whose monitors roared and hillsides came tumbling down bearing gold and muck will reopen again within the next two months. However, its re-opening past objectionable features will be eliminated. Instead of tearing the hills away with water, modern methods of mining, in which electrial muckers, scrubbers and sluice boxes to handle the gravel will be used.

This is made known by Jack Johnson of San Francisco, widely known mining engineer and capitalist, who with Jack Sullivan, hotel chain owner, announced they had purchased the mine from the Vinton Estate.

The Cherokee mine embraces nearly 2,000 acres of land. Operations started at the Cherokee in 1853 and continued until 1900. During this time from one and one-eighth mile of channel the owners took out $17,000,000 in gold. It is the only mine in California, the experts say, which has yielded every owner a profit. During the early days of the Cherokee it was owned by Secretary of the Interior Andrew Mellon. Even up to the last day the monitors tore down huge banks of the Cherokee and large cleanups were recorded. Operations ceased when the water rights were sold to the Pacific Gas and Electric Company and after the anti-debis law became effective.

The new method of operation calls for the installation of electrical muckers, a monorail system and other machinery. Johnson, who will be in charge of operations says it is his intention of handling 5,000 yards of gravel each day. Exhaustive sampling has proved that a large acreage of virgin gravel will yield the operators from $2.75 to $3.50 a yard.

A large amount of development work has been completed at the Chrokee. This includes a tunnel ten feet by twelve feet in diamater and 2,765 feet in length, driven through solid bedrock. This is the tunnel in which all the gravel of the once famous old Cherokee was washed. A second tunnel 900 feet in length was driven by Lou Glass, once manager of the mine and later president of the Pacific Telephone and Telegraph company. The Glass tunnel travels through nearly 1,000 feet of pay dirt much of which is easily available.

Renewed activity at the Cherokee has been made possible by the formation of irrigation districts in the Oroville district from which the mine will obtain water. Besides the supply from the irrigation districts five big reservoirs have been purchased by the mining men. These reservoirs cover over one thousand acres of land and are said by Johnson to represent an investment of over $300,000.

The Cherokee will be operated under a corporate name of the Cherokee Gold Drift and Mining Company the officers of which are Jack Sullivan, San Francisco, president; Jack Johnson, San Francisco, vice-president and general manager; Alex L. Wilson of Oroville, secretary-treasurer. E. Hutchings, prominent San Francisco specialist will compose the board of directors of the new mining company.

It is at the Cherokee where the records of the United States mint show one clean-up of $470,000. It is also at the Cherokee where state mining bureau records show that over three hundred diamons have been found.

MOTHER LODE WILL SEE BIG MINE ACTIVITY AGAIN

Ray H. Harris, well known mining man, was a visitor in this section fore part of last week. Mr. Harris was completing a tour of the Mother Lode section on an inspection of various mining properties. He was very enthusiastic over the prospects of a revival of the gold mining industry and expressed the opinion that the counties of the Mother Lode would be a center of the ativity that would be manifest in the very future. From here Mr. Harris went to Reno where he visited several mining properties. The Reno Gazette had the following to say relative to his visit in that ity: "After an absene of eight years, Ray D. Harris, widely known as a broker, writer and mine operator, has arrived in Reno after a two weeks' visit of inspetion to the various mining distrits along the Mother Lode in Tuolumne, Calaveras, Nevada and Amador counties of California. He was a pioneer in the southern Nevada amps, inluding Tonopah and Goldfield, and later operated properties in the various amps of the state, partiularly at Seven Troughs, now in Pershing ounty, where he developed the rih Harris lease on a part of the vast territory omprising the present estate of the Seven Troughs Gold MMine, Inc. He now resides in Los Angeles and will spend a day or two here before returning home.

In speaking of his observations on the Mother Lode, Harris said:

"It would seem that Mother Lode mine and claim owners have taken it into their heads to do their bit in relieving the much talked of shortage of gold, frequently advanced as one of the causes of the current financial depression throughout the world. It is amazing to see the renewed and steadily increasing mining activity, particularly in Amador and Calaveras coonties. I found that capital from all parts of the country, out especially from San Francisco and Los Angeles, is taking hold of both old and new lode and placer properties and obtaining remarkably good results.

"Jackson in Amador County, notable as the location of the Argonaut and Kennedy mines, is a particularly active spot. At a depth of 5800 feet, the Argonaut has opened up a body of ore running better than 25 a ton for a widih of over fifty feet, and with only one of the walls of the vein exposed. The Kennedy is also obtaining excellent results at great depth. In consequence of these deep ore disclosures, other properties not only in Jackson but for miles north and south are either already sending their shafts to lower horizons or are preparing to do so, and practically all of them are being rewarded by the exposure of new ore bodies. The Boston Calaveras properties near Mokelumne Hill, of which 'Bat' Sullivan, oldtime Southern Nevada operator, is general manager, is showing up in excellent fashion. The drift-placer properties are also giving an account of themselves, notably the Boundary Cone mine, in the same general locality, of which John McSorley also a former Nevada operator is general manager."

0

SINKING OF SHAFT ON GOLDFIELD PROPERTY

The three-compartment of the vertical shaft at the Pittsburgh-Goldfield Mine (Goldfield, Nev.) has gained a depth of 230 feet, with seams of quartz and alaskite showing in the bottom. The workings are apparently entering a zone of considerable promise.

The company has just completed the installation of a powerful hoist and the installation of a huge compressor and plans to sink to the 600 foot level before starting lateral work. The shaft will be sent down to a total depth of 2,000 feet unless important ore bodies are developed above that point.

Repairing of the Goldfield Deep-Mines shaft is proceeding near the 2,750 foot level, preparatory to resuming sinking to a depth of 2,750 feet. The management states that the core drills indicate promising geological conditions at this depth.

CONGRESSMAN AND MRS ENGELBRIGHT GO EAST NEXT WEEK

Congressman and Mrs. H. L. Engelbright are leaving some time next week for Washington where "Harry" will resume his labors for his district. However, he has not been idle during the past summer months as he has covered over 11,000 miles in his district in the interest of his constituency.

His travels took him to nearly every county in the district on which he endured the heat of Merced in September and was caught in a snow storm in Lassen county in November. He has personally inspected all the government projects in his district including National Parks; National roads and geological surveys and forest service development. His main object is to speed up the work so as to make a satisfactory report to Congress and thus make possible another raid on the treasury for more appropriations.

The last session of Congress saw the passage of the Engelbright Fire Prevention bill which calls for a hundred million dollars to be spent over a period of twenty years on a road building program. This will prove a great boon to the unemployment problem, which is the greatest problem facing the nation today.

With the mining interest at heart he will press further exemption of the Federal Income Gold Tax which should speed up production of gold and thus give employment to more men. The re-valuation of gold will also come up for consideration.

One of the biggest fights that confronts Congressman Engelbright in the coming session will be to protect the Reapportionment bill which was passed in June 1929, due to the leadership of two of California's splendid statesmen, Senator Johnson and Congressman Engelbright. This bill gives to California 9 additional Congressmen which raised the status of California from one of comparative obscurity to one of major importance. However, California's gain meant the loss to some of the Southern and Eastern states who are preparing to fight heavily for their rights. A clever piece of strategy, considered the finest since the Civil War, on the part of Congressman Engelbright won the southern vote last time so no doubt our Congressman still has a few tricks.

So, if Nevada Cityians have seen little of their distinguished Congressman during his vacation they may rest assured that he has been busy every minute preparing for a busy session at Congress.

0

STRINGER YIELDS THREE TONS OF RICH GOLD ORE

MOHAVE, Calif—The discovery of a one inch stringer of gold ore that yielded $275 a ton on the Lillian V claim of the Consolidated Mines property may lead to the exploration of a large area of virgin ground. The mine is leased to Edward E. Kelley, of Los Angeles, an attorney, and the discovery was made by Al Sanderson and Joe Shea. On the Bing Hole claim south of the Lillian V. Sanderson and Shea are running a crosscut tunnel 200 feet to cut a good surface showing. The adit has been advanced about 160 feet and when it reaches the vein will give 175 feet of backing.

0

B. H. & S. COMPANY TAKES UP OPTION

The Bunker Hill and Sullivan Company has taken up its option on the Imperial group of gold properties near Battle Mountain (Nev.) and started vigorous work. The holdings are located in the Galena district and the deal ranks among the most important consummated in the past several years.

0

GIBSONVILLE MINE IS REPAIRING DITCHES

The Gold Cup mine above Gibsonville, is busy repairing and building ditches and flume for catching all the fall and winter rain possible to be used in their spring operations. Mrs. Belle C. Brown and William Brown of Fresno are the main owners and confidently expect to make a record breaking clean-up next season.

THREE MEN HAD CLOSE SHAVE IN MURCHIE

Bottom Falls Out of Winz—Mud, Water and Rock Hurls Treo 70 feet

A near tragedy took place at the Murchie mine last Thursday and 3 men had a most meraculous escape from death. The accident occurred at about eleven o'clock when Phil Alvarado, a miner, and his helper Geo. Saunders went on shift. The two men were working in the breast of an upraise that ran upward at an angle of about 50 degrees and was being driven to tap and drain a winz above which contained about 40 feet of water, muck and debris. Upon gaining the breast, Alvarado noticed a small trickle of water coming through the rock overhead and returned to the surface to make a report to Foreman Cole. Cole accompanied Alvarado back to the face and as the three men were inspecting the roof, through which the water was oozing, the bottom of the winz suddenly gave way like a heavy blast and tons of water and mud were precipitated down on them. Foreman Cole was standing close to a safety nich and dodged most of the deluge, but Alvarado and Saunders were overwhelmed and swept down the incline by the flood for a distance of about seventy feet.

Both men escaped with their lives but both were more or less injured. Alvarado was driven against and partly under a heavy timber where he lay helpless while the flood swept over him and escaped with a slightly mangled hand and wrist.

Saunders was not so fortunate. Struck by the flood he was hurled down the shaft a distance of some seventy feet and was picked up by other workmen for dead, who had rushed to the rescue. Reviving later, it was found that he had sustained serious, though not fatal injuries.

The examination revealed that he had three cuts on the head; one ear drum had burst from the concussion and one hand was badly mashed and bruised.

Other workmen in the mine declared that when the breast gave way and the flood started down the incline, it made a report very similar to a heavy blast. and the wonder is how any three men could go through such an ordeal and come out alive.

0

OLD KELLY MINE AT RANDSBURG PROSPERING

RANDSBURG, Calf. Nov. 16—Both the Kelly and Santa Fe mines of the old California Rand mining company, now operating by the Wartley Consolidated Mines, are producing ore and the property is taking on its old air of prosperity with leases flourishing.

Frank M. Lamley, engineer in charge of operations, report that a station has been cut at the new strike on the twelfth level of the Santa Fe property preparatory to sinking of a winze on the ore body. The ore body, he says is 28 feet wide and is looking fine. Over 400 tons of ore has been taken out and milled while in process of cutting the station.

Shipments have been made in the past two weeks by McKinney and Whitney, Cole and Fisher, Ronning and Ferblick, Bohen and Torsney and Tibbits, leasing in the Kelley mine according to reports. Charles Norman will have a car of oxide ore ready this week from the second levl of the Kelly No. 1 shaft and the company will send a carload of concentrates to the smelter from the Santa Fe ore.

Manager Lamley reports that the new hoist is running fine and both shipping and milling ore is being hoisted through the Kelley No. 6 shaft, one of the rich spots of the California Rand mine, the first since the mine closed down in 1926.

With the issue of this week, The Nugget celebrates its 4th birthday. In the few years of its life and activities it has undergone many trials and tribulations and has had more than its share of hardships and though the struggle at times has been hard, we feel now that it has not been made in vain for we can truthfully say that The Nugget, like its namesake, has proven its metal.

When The Nugget came into existance four years ago the venture was made under the protests and advice of prominent newspaper people throughout the state. Nevada City was known far and wide as a "newspaper graveyard" and we were told to stay away. Disregarding this advice we came to Nevada City and founded the Nugget and we are glad we did. We can't say we have grown rich from the business, but we can say that we have steadily and persistently progressed until today we feel, if not satisfied, at least content with the progress made. The Nugget has long since discarded its swaddling cloths and is an established business of worth in which we feel that we have the right to harbar a certain amount of pride. Almost daily the mails bring in subscriptions both renewals and originals along with wonderful words of commendation.

The mining interests have appreciated the support and good will The Nugget has given this industry and have given unalloyed support to the paper, for which we thank them. The Nugget will continue its boosting of the mining interests from every angle, fully realizing that this is a mining country and whatever helps the mining industry helps Nevada City and every citizen in it.—Thank you.

In another column of the Nugget today appears an article in which Alden Anderson, a well-known Sacramento Banker and financier expresses some very pertinent views relative to the mining industry in this state as well as throughout the nation.

Mr. Anderson has taken the same views that the Nugget has been advocating for the past couple of months but he has enlarged upon the plan to assist the mining indusry to some extent by declaring that gold mining should be exempt from taxation and other petty annoyances that now discourages the industry.

It has been announced that Congressman Englebright of this district has declared his intentions of introducing a bill in congress that would serve to advance the price of gold to the producer. The bill will also contain other features that will tend to create an interest in the gold mining industry and aid in the development of mining properties

Mr. Anderson has expressed the opinion that the government should not only advance the price of gold but that it should as well lend assistance by abolishing all taxes on mines and also should pay the cost of compensation for the employees of these companies. He points out that such a course would not result in any great loss to the counties where gold mines are located because of the fact that the increased payrolls would serve to offset any loss of taxes through the increased buying and property values.

This is probably the most radical theory that has yet been advanced in the interest of mining but it is a correct theory and if ever put into effect will work nothing but good to every section of the country. Many will disagree with Mr. Anderson as they have with the Nugget, but we notice that many leading statesmen of the nation in the past two months are beginning to discuss the question publicly. The theory is a logical one and is worthy of consideration.

The lack of gold production is becoming a serious question and various theories are being advanced to encourage the mining industry. We have pointed out that at the present rate of decrease the gold surplus will become exhausted within a decade. "Tax and compensation costs in California have been among the elements that has contributed to the condition that has discouraged mining in this state," says Mr. Anderson. "No employer is asking for an abolishment of either of these but it is pointed out that they are helping to strangle the industry and that outside capital will not invest money in the development of mining properties where such a situation exists.

There are hundreds of properties on the Mother Lode that can be easily brought into the producing field with development work. Today they are lying idle with but little interest being manifested in them by persons that could be interested under more favorable conditions.

If the value of the gold ounce could be raised, to, say, $25 and with it the abolition of all taxes and the payment of compensation we would see a vast change in the mining industry almost over night."

"The winter season has arrived and once more we have the question of keeping the Yuba Pass open for travel" says the Sierra Valley News.

The Nugget is in hearty accord with the News on this matter for the closing of the Yuba pass not only means the cutting off of communication between communities, but it means the loss of thousands of tourists traveling from Seattle, Portland, Tacoma and even clear up to the Canadian line who take the southern route going to points east as soon as the passes close in the Cascades. We know, personally of hundreds of tourists who go to Utah and Colorado via Sacramento and the Yuba pass. Let's keep the pass open by all means and let's do it now.

COMPARATIVE VALUE OF GOLD.

Nevada City, Nov. 16.

Editor Nugget:—

Reading your editorial appearing in the Nugget a couple of weeks ago I started to think over the subject of the relative comparison of the purchasing value of the gold dollar of today and what it was some thirty years ago or more and was amazed at the difference in the purchasing value of gold today and as it was in ye olden times when the gold standard was made a matter of fact.

I was born in Napa county in 1862 and moved to Fresno county in 1890 where I took charge of a 2,000 acre hog ranch and raised on an average of one thousand hogs a year and about fifty head of beef cattle. I remember very distinctly that at time fat hogs sold on the usual average for about three and one-half cents a pound and beef for around five cents with one half of the price knocked off. I could buy the best of home cured bacon for 10 cents a pound and the best of cuts of beef for 16 cents apound. Flour at that time was selling for $1.00 a sack and everything else according. An ounce of gold was worth $20 (if fine) the same as now. Prices now for the same commodities are—park in meat markets 30c to 35c a pound, beef from 20c to 30c a pound; flour $1.85 per sack; bacon from 30c to 45c a pound and still an ounce of gold is only worth $20 and silver isn't worth mining.

If silver had a standard value of say, 75c an ounce in the bar, it would not be sixty days before one hundred thousand men would be put to work in silver mines and the work of making and supplying the mines with necessities at a wage of not less than four dollars per day for every man employed which would mean a pay-roll of not less than $450,000 per day paid out for labor alone without counting all the other supplies and necessities that would have to be bought and used by these silver mines and miners. Now, ,the question is, with me, why should we have hard times when the governmnt has it within their power to stablize silver as well as gold and start the wheels of progress revolving at a sped unheard of before.

Now, what I want to know is this—if the federal government has the power to go into the what businss—buy up millions of bushels of wheat and store it away in rented elevators through the medium of the farm relief board, all done to stablilize the price of wheat— why in the name of common sense can not they also buy the miners silver bullion and store that away in the basement of the sub-treasury as well? The wheat will spoil in the course of time and will have to be sold at a loss in the end whereas the silver bullion would last for ever. Why is it that the government can STABILIZE one product and not another?.

I have been mining now for over 40 years and it seems to me the man who produces the metal on which all values are based, (gold and silver) is certainly getting a crooked deal from our Uncle Samuel. Let's call for a new deck of cards."

Yours truly,

S. A. SHARP.

Mrs. F. F. Breese left Wednesday morning for San Francisco where she will spend a few days.

Mr. and Mrs. Argelo Cartiscelli are visiting friends and relatives in Sacramento for a few days.

Dan Powers, who has been working at the Twin Sisters mine returned to the city to spend the winter Wednesday.

THE HOME AND KITCHEN

Written for the Nugget by
LAURA SNOW

As Thanksgiving is almost here and Christmass not so very far away the housewife's thoughts naturallly turn to good things to eat and how to prepare them. Many,very many tasty dishes can be prepared from a few simple ingredients that can generally be found around the pantry shelf if one only thinks of them or reads of them.

Cornstarch Ice Cream Cusrtad

Scald one quart of rich milk or thin cream over hot water. Mix tree tablespoons cornstarch with three tablespoons cold milk, dilute with a little of the hot milk and then add to the rest of the hot milk. Stir continually until smooth and creamy. Cover and let cook over hot water for fifteen minutes. Beat four egg yolks with one cup of sugar and add to the hot mixture. Stirr constantly until the egg is set. Cool and add two teaspoons vanilla or you can use any other desired flavor and freeze as usual.

—X—

Now here's another custard cream I have found very fine but is a little more difficult to make. It is called

Carmel Custard Ice Cream

Put one cup o fsugar in an iron frying pan and stir until melted and golden syrup is formed. Add one-half cup boiling water and simmer until of syruplike consistency. Add this to one quart rich milk that has been scalded over hot water. Mix four tablespoons cold milk with two tablespoons cornstarch and stir into the hot milk. Stir constantly until smooth and creamy. Cover and cook for about 15 minutes over hot water. Beat four egg yolks with one-half cup sugar and a few grains of salt and add to the hot mixture. Stir until egg is set. Cool and add one and one-half teaspoons vanilla and one cup of cream beaten until stiff. Freeze.

Chocolate Charlotte.

Soak one tablespoon gelatine in one-fourth cup cold water. Melt one and one-half squares of chocolate over hot water. Add one-third cup of sifted powdered sugar and three teaspoons boiling water and stir until smooth. Pour one-third cup of scalded cream over the softened gelatin and add to the hot chocolate mixture. Strain and add one teaspoon vanilla. Set in a pan of ice water, and when mixture begins to congeal fold in three rups of cream beaten hntil stiff with one-third cup sifted powdered sugar. Line mold with lady fingers as for any charlotte and fill with the chocolate mixture. Chill. The Charlotte should hold its shape when turned out on serving platters.

Green Frosting.

Mix one fourth cup sweet cream with one and one-fourth cups sifted powdered sugar. Add a few drops of vanilla and almond extract and color with green vegetable coloring.

Date Bars

Beat four egg yolks with one cup sugar and three teaspoons boiling water and beat until light. Add one package chopped dates, one cup of black walnuts, three drops of vanilla and one and one-half cup of sifted flour, sifted again with two and one half teaspoons baking powder. Bake in moderate oven 25 minutes. Cut in bars with sharp knife and roll in granulated sugar.

BALTIMORE TO HAVE A RUM RUNNER'S PRISON

Unless patriotis mand sentiment win out against practicability, Fort McHenry at Baltimpre, birthplace of "Star Spangled Banner", may yet house a federal prison for liquor law violators. The Department of Justice in Washington is proposing this transformation of the national shrine into a Valsteadian hoosegaw over the vigerous protests of patriotic societies.

A building at the fort is now occupied by various branches of the government, including an office for federal phohibition agents. It is planned to build a number of cells there to detain offenders against the law. However, the project may never be carried through because of opposition from the American Legion and other organizations.

Former Congressman, John Philip Hill, of Maryland, candidate for re-election, asserted in a letter to the attorney general that the scheme is as inappropriate as a proposal to place a federal prison in the middle of Arlington Cemetery or in the home of George Washington at Mount Vernon. Mr. Hill, who was in congress when the fort was made a national shrine, also questioned the legality of ths move on the part of the Department.

WITH THE HUMORIST

A pessmist is an optimist who has just changed a tire.

—X—

In the good old days the man who saved money was a miser. Now, he's a wonder.

—X—

Mother—"Well, Jimmy, do you think your teacher likes you?"

Jimmy—"I think so, mummy, because she makes a big kiss on all my 'rithmetic."

—X—

Judge—"have you anything to offer the court before sentence is passed upon you?"

Prisoner—"Not a durn cent, yer honor; me lawyer took me last dollar."

—X—

"Well," said the visitor to the little son of the famous motorist, "and how are you getting on at school?"

"Fine," said the little chap. "I'm now learning words of five cylinders."

—X—

Visitor (looking over fraterity house)—"Don't you know roller towels are against the law?"

Brother—"Oh yes, but that one was put up there before the law was passed."

—X—

Wife (trying on hats) "Do you like this turned down, dear?"

Husband—"How much is it?"

"Eleven dollars."

"Yes, turn it down."

—X—

Ephram—"What you call it when a gal gits married three times—bigotry?"

Mose—"Lawsy, boy, you suttenly am a ignoramus. Why, when a gal gits married two times, dat am bigotry; when she gits married three times, dat am trigonometry."

—X—

It is said that the Sheiks of Morocco are buying large American automobiles in which to take the ladies of their harems out riding. We warn them it is dangerous to drive with one arm while having the other around a harem.

In a courtroom the other day, the judge was reproving a colored man for deserting his wife and dwelt at great length on the injustice he was doing.

"Wife desertion is something, Rastus, that I must deal with severely I'm afraid, and I feel very strongly on the subject."

"But, Jedge, you don't know that woman. I ain't no deserter, I's a refugee."

—0—

FRENCH CORREL NEWS

Well, real winter is here at last. Rain, hail, snow frost and wind have visited our section durin gthe past week. The rain storm of last Saturday night relieved many of the work of picking late pears and apples. Morning found the ground strewn with this fruit. The weather has turned very cold buf we will not worry for we are sure that in our California, and particularly in Nevada county, many days of pleasant sunshinny days will follow. It is a privelege to live in this wonderful climate.

Mrs. J. W. Culver accompanied by Mrs. Elsie Schwarz on a trip to Yuba City, Wednesday, to be in attendance at the meeting of the chapter of O. E. S.,at that place. Both ladies attended the chapter at Smartsville of which both are members. This, also was a happy event, it being the time at which officers were elctd for the ensuing year. More than fifty visitors were present from outside points and aftr the lodge work was completed a sumptuous banquet was served.

A delegation of the Merry Makers Club of Sweetland paid a visit to French Correl Wednesday evening. They are making plans to form a Basket Ball team.

F. Stephens of Graniteville had business in French Corral Wednesday and Thursday.

Mr. Frazer Thomas of Los Angeles, is visiting his niece, Mrs. Vivian of this place.

Lloyd Hazeletts made a trip to Bangor, Thursday and returned with Mr. F. Bean, who had business at that place.

Mr. and Mrs. P. H. Flynn of Nevada City were Friday visitors. Mr. Flynn returned to Nevada City while Mrs. Flynn remained to visit for a few days with her friend Mrs. K. Sullivan.

Miss Louise Moulton arrive from Washington, Friday evening to spend the week-end with her parents at this place.

W. E. Moulton made a business trip to Marysville, Saturday. He was accompanied by F. Bean.

Miss Millie Clerkin was a visitor from Pike City, Saturday.

Mr. and Mrs. Glenn Orr (nee Henretta Haslett,) returned from their wedding tour up into Oregon and Washington, Saturday. Despite the rain storm, their many friends did not fail to give the usual Chairvori. After furnishing a medley of "jazz" in many keys games were played and delicious refreshments were served. After spending a couple of weeks with Mrs. Orr's father, the happy couple will leave for their future home in Hood, just below Sacramento.

Henry Flynn was a visitor from Colgate, Sunday evening. His mother Mrs. P. H. Flynn, accompanied him to Nevada City.

Clyde Browning came down from Mount Atto Mine, Monday.

The weather is clear this morning with a heavy frost last night.

—0—

DEMAND FOR COPPER IS GOOD AND PRICE RISING

The recent decline in the price of copper created a foreign demand that has turned the tide in the opposite direction.

Foreign demand was more insistent than domestic owing largely to the fact that European consumers had held off placing business for a much longer period than the American consumer, says the weekly market news service.

The virtual settlement of the strike among the metal workers in Germany, together with the somewhat improved political situation in Europe, was reflected during the past week in the increased buying of metals abroad.

Despite slow business, prices for lead in the domestic market held on an even basis with the tone steady and a much brighter outlook.

Silver was steady on a moderate buying basis for India and China.

Quicksilver was offered quite freely and the prices named were all in all, steady.

Work Called for and Delivered

EXACTLY

A match of considerable importance was in progress and one player was driving and approaching brilliantly, but putting very badly.

One of the spectators remarked to that player's caddie: "Your man is driving wonderfully well."

"Aye," replied the caddie, cynically, "but what's the good o' puttin' an umbrella up if your boots are leakin'."

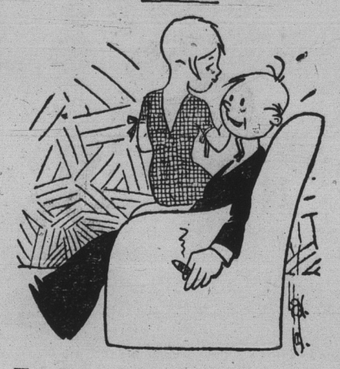
Her Last Resort

She insisted hotly that, economy or no economy, she must have a new frock, and he, with equal warmth, declined to produce the cash.

"I'll never speak to you again!" she said, angrily.

"How like a woman!" he sighed. "When everything else fails, you try bribery!"—Stray Stories.

EVERY-DAY SUIT



He—Yes, I have a suit for every day in the week.

She—The one you have on now?

Household Economy

Maid (to spring cleaning housekeeper)—There are half a dozen men downstairs with vacuum cleaners. They say they have appointments to give demonstrations.

Mistress—Yes, I sent for them. Put them in different rooms and tell them to get busy.—Humorist.

LOCAL HAPPENINGS

William Litchenberg, a well known mining man of Santa Rosa, who has been spending a few days in Alleghaney taking a bir's-eye view of that mining district, returned to the city Wednesday.

Mark Sands and L. S. Sumner who travel out of Sacramento, was in the city calling on customers the middle of the week.

Miss Minnie Brand attended the Saturday Club concert given in Sacramento last week and returned to her home in this city Wednesday.

Fred C. Yost and George Casich departed Tuesday by auto for Bakersfield on business matters. They will return next week.

Manager Carl G. Tobiassen of the county farm, who was seriously injured some time ago while at work at that institution, left Monday for San Francisco to consult with specialists in regard to his condition. His recovery from his injuries has not been at all satisfactory and finally decided to visit the Bay City and see what a specialist has to say.

Dr. Thomas R. Haig came up from Sacramento Tuesday evening to consult with Dr. R. E. Werner regarding injuries suffered by Gordon Tamblyn at the Spanish Mine last Tuesday.

Mrs. J .H. O'Connor of this city, Mrs. G. A. Jacobs and Dan Sullivan of Downeyville returned Tuesday from San Francisco where they attended the funeral of the late Mrs. Johanna Shaughnesy.

District Attorney W. E. Wright, Sheriff George R. Carter and Court Reporter Miles D. Coughlin has returned from Truckee where they went last week to attend a preliminary hearing.

C. N. Gregory, and A. W. Shovel, of Sacramento, were at the National Hotel in this city Tuesday.

Wesley W. Davis, who is spending some time at the beautiful country home of his parents at Willow Valley, motored to Reno last week end. He found that part of the country very cold and disagreeable. However, he reports having had a most delightful trip.

Miss Josephine Gerasci, who has been spending a few days in Sacramento has returned to her home.

Miss June Hume, daughter of Mr. and Mrs. T. C. Hume of 314 Cayote St., accompanied by her little niece Miss Peggy Gene Nagel, arrived in Nevada City Friday from a month's vacation spent in shooting grouse and pheasants in the upper Okanogan country on the Canadian border and reports fine sport this season, birds being plentiful. On her return to the south she brought with her Miss Peggy, who will spend the winter with her grand-parents, Mr. and Mrs. Hume and will attend school here this winter. Miss June left for San Francisco, Monday but will return for the holidays.

CALIFORNIA 50 YEARS AGO

The attention of the people of California during September of 1880 on the visit to this state of President Hayes; at Blue Canyon, Placer county, the party were met, headed by a committee with Governor Perkins and all fears that the president would be given a cool reception on account of him vetoeing the anti-Chinese restriction act were dissipated.

In San Francisco, after leading the presidential parade up Market street members of the Society of Pioneers marched to their hall and enjoyed a feast of reason and a flow of soul. The "flow" however, was so full that finally an argument started. The old timers attempted to settle it with their fists and the police had to be called in to restore order.

San Francisco working men had a big demonstration for the purpose of impressing upon President Hayes the importance of freeing this state of Chinese and other undesirable aliens in our midst.

Cole's mammoth circus came to California overland with the largest menagerie that had ever been seen in the state. There was no performance on Sunday but instead the clown preached a sermon to a large audience and the show made money. A dynamo, mounted upon a truck and run by a steam engine supplied the electric current for the newly invented electric lamps which lighted the huge circus tent.

George Faber, a San Francisco workman unable to secure employment went to El Dorado county on a prospecting trip and unearthed a pocket that yielded $1,600 in gold nuggets.

The Forest Queen gold mine in the Downieville, Sirra County, district, closed for a decade on account of financial difficulties was reopened and the new owners struck a vein of ore that ran $1,000 to the ton.

A hydraulic mine in Trinity county after a run of six weeks cleaned up $17,000 in gold.

Bodie, Mono county now loomed up as a perfect treasure producer. The shipments of bullion from its six producing mines in one month amounted to $201,058.

The Rocky Bar Quartz mine at Grass Valley, Nevada county ran 750 pounds of ore through its quartz mill and the yield was $9,650, equal to $130 a pound. The ore was more than half gold.

The United States Mint at San Francisco in the month of September coined 77,000 twenty-dollar; 19,000 ten dollar and 304,000 five-dollar gold pieces, and 600,000 silver dollars. This entire coinage was product of California mines.

The cornerstone of the University of Southern California was laid at Los Angeles City on September 4. Bishops of the Methodist church was assisted by the governor who had donated a portion of the site.

A blight struck the orchards of Calaveras county and caused a heavy dropping of green fruit to the great financial loss of the fruit growers.

Glanders became epidemic among the horses of Yolo county and many were being killed in order to stamp out the disease.

L. J. Ross of Los Angeles county made a contract to sell 100,000 gallons of brandy he contemplated making from his grape crop.

During the month two thousand sacks of wheat from nearby grain fields were daily put in the warehouses at Davis, Yolo county.

A den of over thirty rattlesnakes was uncovered by a prospector while blasting on Bald Mountain in Sierra county.

A Sanbernadino Indian, wounded a buck one morning and persued it all day without overtaking it. Camping on its trail at night he took up the persuit the next morning and in the afternoon captured his prize. He had trailed the bock seventy miles, and triumphantly shouldered it and carried it back to his camp.

The San Francisco "Examiner" which for some years had a precarious existence, was purchased this month by W. C. Caruthers and pivoted in its career.

The monument over the grave of Mark Hopkins, one of the builders of the Central Pacific railroad, was completed in the city cemetery at Sacramento on September 28. It was constructed of granite, some of the blocks weighing thirty-six tons; required eighteen months to build and cost over $50,000.

Three Chinese lepers was found secreted in a Tehama county cabin. They had been kept concealed for more than a year by their countrymen.

A miner, broke, cold and hungry, while walking from Downeyville to Oroville stopped on the bank of the Yuba river and built a fire to warm up. While scratching a hole in the sand in which to build his fire he picked up a nugget of pure gold which he sold the next day for $134.

CLUB MEETING

The Thursday Club held a meeting Thursday afternoon at 2 o'clock at the home of Mrs. Percy Watters and the usual good time was thoroughly enjoyed by the ladies present.

ANOTHER PIONEER GOES TO HIS LONG REST

John Davidson Murray, one of Gold Flat's highly respected residents passed away at his home shortly after midnight Tuesday morning as the climax of a recent illness extending over a period of several years. He was stricken in his last attack which occurred about a week ago and his condition grew steadily worse until the end. John Murray was born in Scotland April 15, 1865 and came to this country and locating at Denver when he was a youth and attained his citizenship at the age of 21. At the time of his death he had reached the age of 64 years, 7 months and 2 days. The funeral services were conducted Wednesday from the Homes Funeral Home in this city at two o'clock, Rev. E. O. Chapel officiating.

Mr. Murray was one of the many adventurous spirits who joined in the gold rush for Alaska in 1897 where he remained for a period of fifteen years during which time he was united in marriage to Miss Julia Dibble. They left Alaska in in 1912 and came to California and settled at Gold Flat where they have since resided and made their home and become prominent among the fruit growers of the region.

Mr. Murray was a man of rugged and stirling character, beloved by all who knew him mainly on account of his friendly personality and sterling principles.. He was always a great favorite with all children on account of his kindly nature.

THIRTY TON UNIT IS ADDED TO MILL

The Basque Mining and Milling Company, located a few miles from Winnamucca and owned by Californians, is adding a thirty-ton unit to its mill, and plans to start production at the rate of fifty tons per day early in December.

Superintendent F. H. Stewart says that development of the new vein of sugar quartz is proceeding nicely with a good tonnage of commercial gold ore blocked out in the main workings. The property is located about seventeen miles north of Winnemucca.

CALIFORNIA MEN BUY THE RAYMOND

It is stated that San Francisco and Los Angeles men have purchased the old Raymon Montana ranch and all its water rights in the Leonard Creek section in the Black Rock Desert (Nev.) section and plan to pipe the water to placers located below the property.

Deposits of gold-bearing detritus are said to cover one thousand acres to a depth of twenty feet. Considerable gold has been recovered from the dry washing process but the new owners expect to reap a rich reward by sluicing operations.

LA PORTE MINE CLOSES

The Feather Fork gravel mine at La Porte has closed down for the winter. C. B. Wingate is superintendent of the mine in which Southern California capital is interested. S. A. Guiberson is the principal stockholder.

Miss Frances Davey and her brother Russel, who spent the week-end in this city with their parents, Mr. and Mrs. Harry Davey, have returned to Berkeley.

YELLOWSTONE MILL IS IS NOW OPERATING

The Yellowstone Mining and Milling Company reports its new milling plant has been finished and will be placed in commission very shortly. The company officials say a wide ledge of pyritic gold has been developed with sufficient reserves to assure a steady run of the new mill for a long period. After the gold has been extracted the residue will be shipped to the California chemical plant for the recovery of sulphuric acid.

WILL STUDY DRAMA

Miss Annie R. Gray, teacher of English in the Nevada City High School in the course of her instruction in this subject is planning to devote several weeks to the plan. Each pupil in the junior and senior classes will be expected to perform a project or take part in a project in the line of the drama.

Some of the pupils are expected to write a one act play; others will remodel a short story into the form of a play and still others will take part in the actual production of the play before an audience.

COUNT OF ABSENT VOTE GIVES WRIGHT MAJORITY

The count of the absentee votes increased the lead of District Attorney W. E. Wright over his opponent of 27. The supervisors finished the count last Thursday.

There were 41 absent votes, 22 of whom chose Wright and 17 voting for Stoll. Two absent voters did not make a choice for district attorney.

The contest was the closest one in the November election and was not really decided until the absenttee votes were counted. However, Mr. Stoll conceded the election to Mr. Wright the day after the election.

HORSESHOE COMMITTEE MEET

The general horseshoe committee that has charge of the fraternal tournament held a final meeting Wednesday evening for the purpose of arranging schedules. The meeting was under the direction of President B. Toccilini. The schedule of games was presented by the committee and final details arranged for the forthcoming tournament.

Lloyd W. Penrose, who spent several days with his parents, Mr. and Mrs. James Penrose, has returned to San Francisco where he is studying art.

Mr. and Mrs. Milton Hill of Los Angeles were recent guests of their aunt, Mrs. M. J. Reynolds.

Fred F. Cassidy, president of the Alpha Hardware and Supply company, left Sunday for San Francisco and Monday evening he was the guest of the Crucible Steel company at Stanford University, where the latest improvements in the manufacture of steel were being shown.

Thomas C. Botting of Alleghany is spending a few days with his parents Mr. and Mrs. Thomas C. Botting of this city. He rencently underwent an operation at the Sutter hospital in Sacramento. He plans to return to Alleghany where he is employed in the Sixteen to One Mine.

Mr. and Mrs. Will Davies of Greenville and Mrs. Ann Davies and daughter of Marysville visited the Frank Davies home here Sunday evening.

Mrs. Elva Meek of San Frannisho visited her sister, Mrs, Elsie Willoughby this week.

E. H. Thompson formerly owner of the Chain Grocerterias, was a visitor here this week. Mr. Thompson now makes his home in Berkeley.

ATTENDANCE AT GRAMMAR SCHOOLS BREAK RECORD

The Nevada City grammar schools have the largest enrollment in a number of years declares Principal Walter Carlson. The enrollment is 255 up to date and the average attendance a fraction better than 96 per cent.

During the past month 179 boys and girls enrolled in the grammar schools were neither absent nor tardy, nearly 70 per cent of all the pupils attending the schools which is a reord to be proud of.

YUBA PASS KEPT OPEN

Reports reaching this office from Downeyville state that the Yuba pass has been kept open for traffic during the past storm period and is said to be the only pass at the present time. There is less than a foot of snow on the roadway and it does not interfere with traffic. Cars are traveling through Downeyville in both directions. However as the roads are wet and slippery it is advisable to use chains.

YOUNG MISS FETE ON NATAL DAY.

Miss Amy Lou McCraney celebateded her eleventh birthday on Wednesday with thirteen little friends as her guests. Pink and white decorations were carried out as the color scheme and the delicious hot lunch was served after appetites had been properly whetted by vigorous playing and was followed by ice cream and cake. The beautiful birthday cake in pink and white with its appropriate number of candles held the place of honor.

Miss Amy Lou was the recipient of many lovely gifts. Her guests included Ida Norton, Betsy Bennetts, Margaret Smidtcamp, Mayme Fradelizo, Ruth Curnow, Flossie Angove, Marian German, Hazel Thomas, Myrtle Barry, Sylvia Moody, Katherine Stevens and Peggy and Madeline Bettles.

Mesdames Hall and Bettles assisted Mrs. McCraney in entertaining the young people.

CAMP FIRE GIRLS LEARN HOUSEKEEPING.

The Adahi Campfire group held a special meeting on Tuesday. Good housekeeping was the subject chosen by the guardian, Miss Nightingale. A little once-act play "John and Honey" given by Jane Warnechke and Madelyn Thompson, was much enjoyed by the girls.

DINNER PRECEEDS STAR INSTALLATION.

Mrs. Charles Leiter entertained a group of out of town ladies at a dinner at the National Hotel on Tuesday evening just before the ceremony in which she was installed as Worthy Matron. Mrs. Leiter's guests were Mrs. W. E. Wilson, Mrs. Frank Hurd Mrs. John Fletcher, and Mrs. Hugh Gibson of Livermore and Mrs. Alice Hitchins the installing officer of Nevada City.

ELKS DINE AS USUAL

The regular Elks dinner last night took the form of a football rally for the bia game. The tables were tastefully decorated with the colors of the colleges. The large number of members who attended did ample justice to the turkey banquet served by a group of the younger members under the direction of Meyers Moberly. His assistants were Jess Mooney, Walter and George Haggerty, Arthur Hoge, Howard Penrose, Roland Wright, Dr. Bell and Werner. College songs were sung.

District Deputy Grand Exalted Ruler Dalmer Janobs of Stoakton Lodge was the honored guest of the evening.

Mrs. Robert Carr was hostess to the Wednesday Bridge Club, composed of Nevada City and Grass Valley ladies. Sixteen tables enjoyed Mrs. Carr's hospitality.

Mrs. Clarence English, the talented daughter of Mrs. Langley of this city, carried one of the lead parts in the beautiful play of the Nine O'Clock Players of the Assistant League production "Snow White and the "Seven Dwarfs,' w'hich was given at the Ambassador Theater at Los Angeles Saturday and Sunday of last week. The players were composed of a group of society women of the south land who are interesting themselves in the maintenance of a day nursery. Mrs. William Gibbs McAdoo was among those who took who took part.

Mrs. English, whose home is in Beverley Hills spends her summers here with her three children visiting her mother.
